### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6-9, 11-18, 20 and 30-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Bono (US 5,954,722).

Bono discloses a fracture repair system including: a plate 10; a bushing 16 with a spherical exterior surface; a first screw or "pin" or "head attachment component" 18 with a cap portion; and a second screw or "body attachment component" 18 with a cap portion (Figs. 5 and 6, col. 3, lines 48-67, cols. 4-5 and col. 6, lines 1-30).

Regarding claims 13, 16, 17 and 20, Bono discloses plate 10 to have multiple holes with bushings 16 (Fig. 1).

### Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 7-9, 11-18, 20, 22-27 and 30-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Weaver et al. (WO 01/19267 A1) in view of Wagner et al. (US 6,030,389).

Weaver et al. disclose a fracture repair system including: a first plate 50; a second plate 80; non-locking screws or pins 10 (or "movable body attachment component") with cap portions 12; and locking screws or pins 20 (or "rigid body

Application/Control Number: 10/633,469

Art Unit: 3733

attachment component") with cap portions 22 wherein combining locking and non-locking screws in the same bone plate provides mixed fixation (Figs. 1-2, 7-8 and 20-21, page 8, lines 12-22 and pages 9-10).

Weaver et al. disclose all elements of the claimed invention except for a bushing with a generally spherical exterior surface.

Wagner et al. teach providing a bushing with a curved or generally spherical exterior surface in a borehole of a plate so that a screw may be rotated and moved to various positions within the borehole (Figs. 2-4 and col. 6, lines 34-67 and col. 7, lines 1-14).

Accordingly, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have provided a bushing with a generally spherical exterior surface, as taught by Wagner et al., in a borehole of either of the Weaver et al. plates 50, 80 in the system of the combination of Weaver et al. and Wagner et al., to enable rotation and movement of a screw to various positions within the borehole.

# Response to Arguments

Applicant's arguments submitted under "REMARKS" in the response filed on July 16, 2007 have been fully considered.

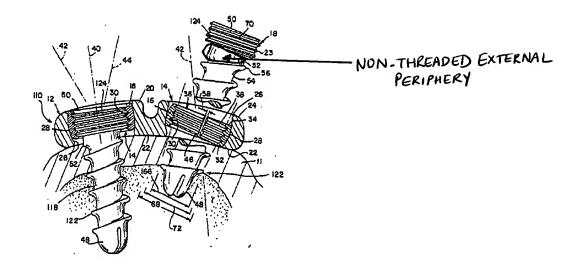

The Examiner is withdrawing the double patenting rejections since a Terminal Disclaimer has been filed in the copending application, 10/100,387.

Applicants' arguments with respect to the rejections of claims under 35 USC 102(b) as being anticipated by Bono (US 5,954,722), are not persuasive. The Examiner is interpreting a pin to mean a cylindrical piece. It is noted that during examination, claims must be interpreted as broadly as their terms reasonably allow. This means that the words of the claim must be given their plain meaning unless applicant has provided a clear definition in the specification. In re Zletz, 13 USPQ2d 1320, 1322 (Fed. Cir. 1989).

The Examiner reiterates that at least a portion of the Bono screw stem has a non-threaded external periphery (see marked up Fig. 6 on the following page).

Application/Control Number: 10/633,469

Art Unit: 3733

Applicants' argument on page 45 that neither Weaver nor Wagner, individually or in combination, teach or suggest the use of a pin having a non-threaded external periphery is not persuasive. Weaver et al. show a portion of their screw stem to have a non-threaded external periphery (see Figs. 1 and 9). Wagner et al. also show a screw or pin having a non-threaded external periphery (see Figs. 3, 4 or 7). The Examiner's interpretation of structure connoted by a pin has been previously discussed.

### Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

**Art Unit: 3733** 

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anu Ramana whose telephone number is (571) 272-4718. The examiner can normally be reached Monday through Friday between 8:00 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eduardo Robert can be reached at (571) 272-4719. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
